SUMMARY

Senior full-stack engineer with 5 years building SaaS products end to end, from React and Next.js front ends to Node.js APIs, databases and payments. Lead Software Engineer at Kinetichex. Previously led a 5-engineer team at Bizdesire and built two products solo. Open to senior and staff roles, remote.

EXPERIENCE

Lead Software Engineer May 2026 - Present
Kinetichex

- Lead full-stack development across client apps for legal tech, accounts-receivable automation and manufacturing quoting: Next.js and React front ends, Node.js server routes, PostgreSQL, Stripe and auth, deployed on Vercel.
- Sterling Forge: built a casting portal end to end with one other engineer. Quote flow with an in-browser 3D model viewer (react-three-fiber), customer dashboard and a drag-and-drop production board, backed by 34 API routes, PostgreSQL through Drizzle, Stripe deposits and ACH, and a CI pipeline that runs 341 tests, migrates and deploys.
- Fixed a CAD volume calculation that underpriced pieces by up to 4%, and added nightly Stripe reconciliation so deposits settle even when a webhook never arrives.
- LawReach: built features on a Next.js and Supabase compliance platform: legal obligations (grown from 17 to 85), statutory deadlines, in-region document analysis and Stripe billing.
- Ship AI features inside these apps, including legal guidance and automated invoice follow-up with dispute triage and human escalation, plus enterprise sign-in through Microsoft Entra ID SSO.

Development Team Lead Feb 2024 - Apr 2026
Bizdesire

- Led a 5-engineer team building Uplevelit, an experience marketplace (1:1 sessions, group classes, live courses, Q&A) on TypeScript, React and Firebase Functions with Twilio Video. Ran client scoping, estimates, code review, mentoring and technical interviews.
- Designed one Session model across the four formats so booking, payment and notification logic stayed in one place; new formats shipped in days, not weeks.
- Built Stripe billing end to end: subscriptions, wallets, refunds and creator payouts. Made every Stripe-touching function idempotent, so webhook retries cannot double-charge or double-pay.
- Built Penbook solo, a reading and writing platform: a NestJS modular monolith over MongoDB with six modules and ~80 REST endpoints, and server-side OpenAI writing tools with per-user token caps and originality checks.
- Built Rocket Rebates solo: ETL from 3 third-party feeds into ~150 active rebate programs on PostgreSQL (AWS RDS), full-text and filtered search, OpenAI reports and document checklists, S3 storage and an admin approval gate before submission.
- Owned CI/CD with GitHub Actions and Bitbucket Pipelines; deployed to GCP (GCR) and Firebase with Docker.

Abhishek Thakur

Experience, skills & education

Associate React & Node.js Developer

Oct 2022 - Dec 2023

Appcore Labs

- Built SaaS and e-commerce front ends in React, Next.js and Redux (cart, orders, product management, headless-CMS content) and contributed to Node.js APIs.
- Integrated Firebase Auth, improved load times with CDN asset delivery and lazy loading, and ran front-end deployments on Vercel.

Frontend Developer (React)

Oct 2021 - Sept 2022

Fyntune Solutions

- Built form builders and insurance product UIs (cyber, term, travel) for 5+ white-label client deployments in React and Redux.
- Managed staging and production releases across concurrent client projects, with CI/CD on Bitbucket Pipelines.

SKILLS

Languages	TypeScript, JavaScript, Python
Frontend	React, Next.js, Redux, Tailwind CSS, react-three-fiber
Backend	Node.js, NestJS, Express, REST APIs
Data	PostgreSQL, MongoDB, Supabase, pgvector, Firebase, Drizzle
Payments	Stripe: subscriptions, payouts, refunds, ACH, webhooks, idempotency
Cloud & DevOps	GCP, AWS (RDS, S3), Vercel, Docker, GitHub Actions, Bitbucket Pipelines
Integrations	Twilio Video, SendGrid, Bunny Stream, Firebase Auth, Microsoft Entra ID
AI	OpenAI and Anthropic APIs, AI agent workflows, document analysis, retrieval (RAG)
Architecture	Multi-tenant systems, RBAC, modular monoliths, system design

EDUCATION

B.Tech, Computer Science & Engineering

2017 - 2021

Baba Banda Singh Bahadur Engineering College
